INGOLD.CA | TSX.V: IGO

FORWARD LOOKING STATEMENT

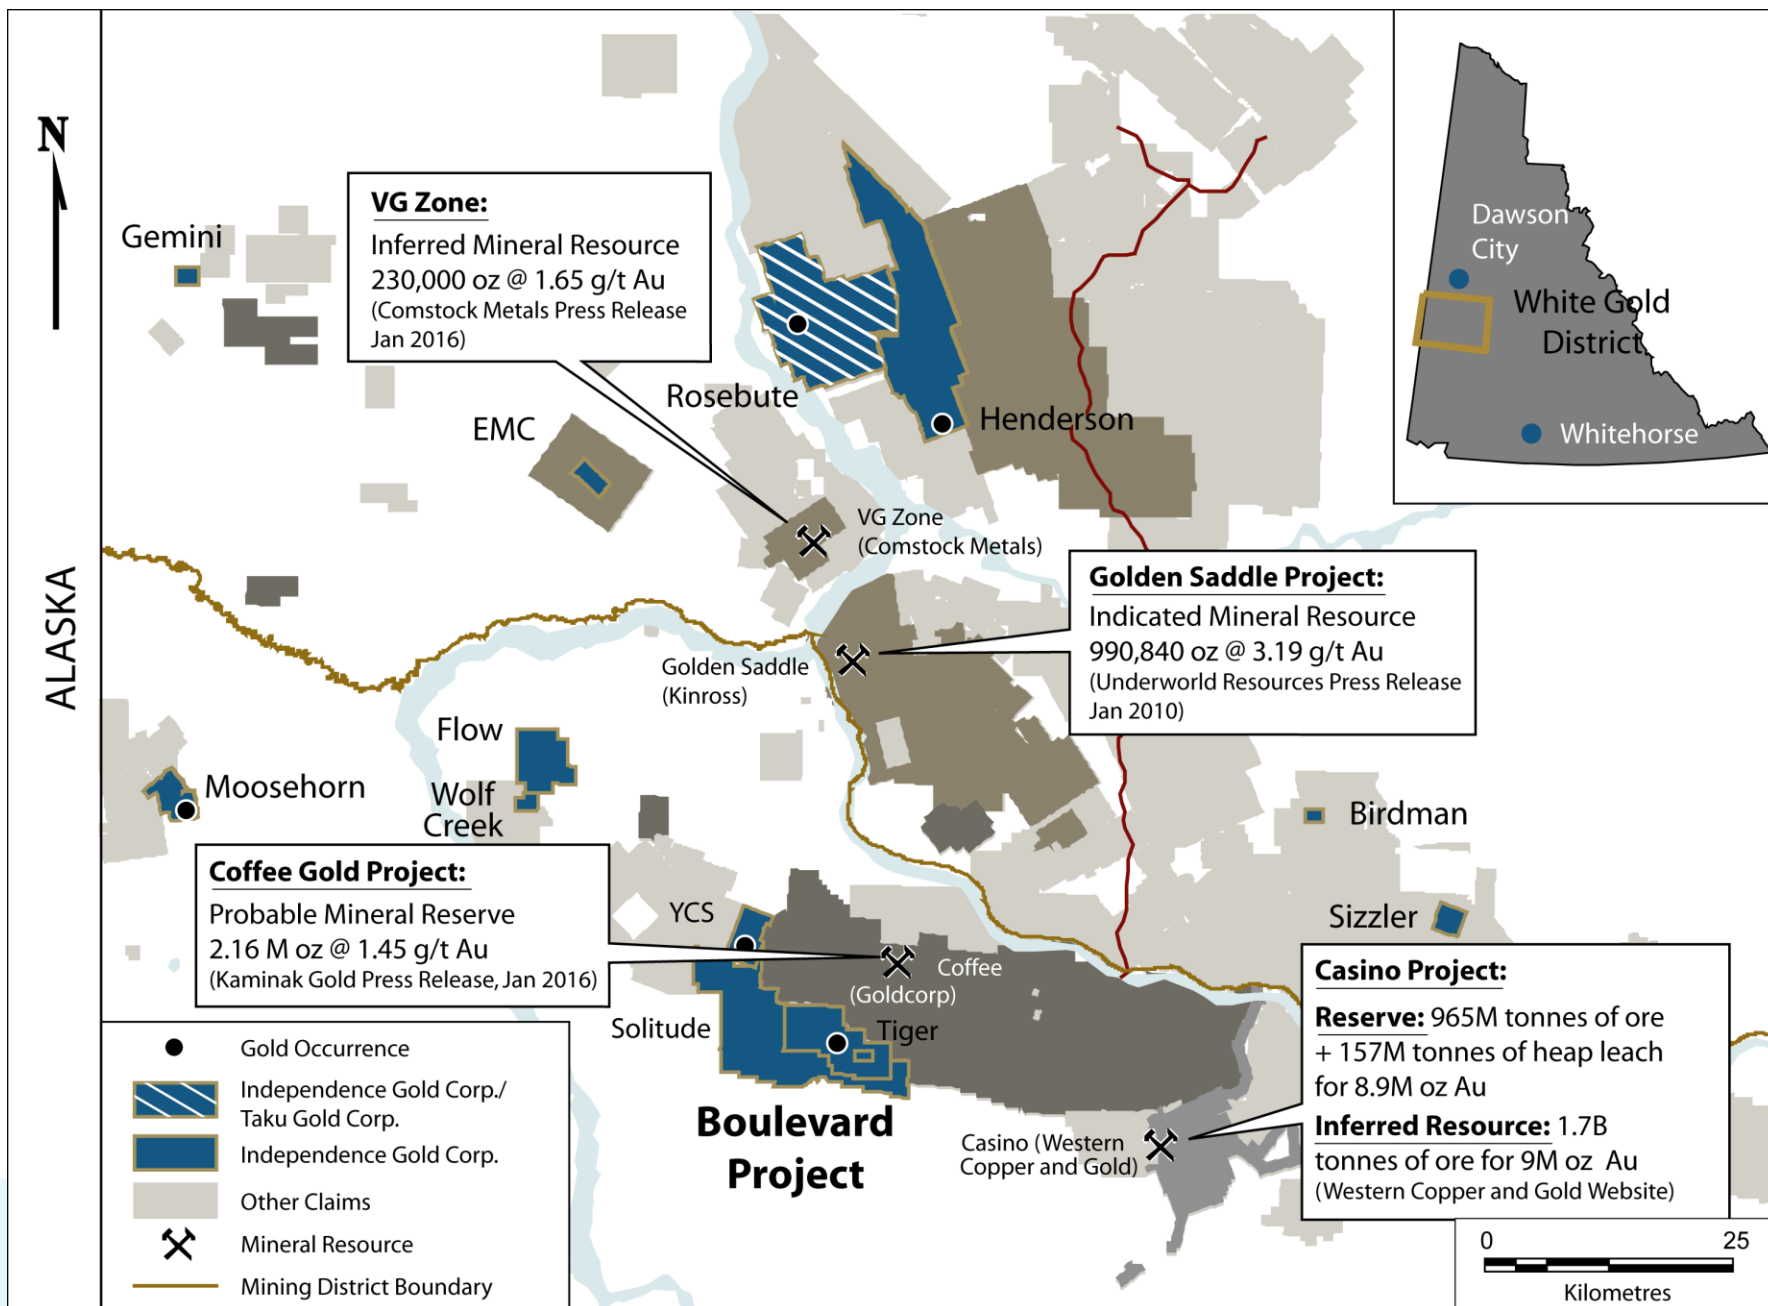

Certain of the statements made and information contained herein is "forward-looking information" within the meaning of the British Columbia Securities Act. This includes statements concerning the Company's plans at its mineral properties, which involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking information. Forward-looking information is subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking information, including, without limitation, the ability of the Company to continue to be able to access the capital markets for the funding necessary to acquire and maintain exploration properties and to carry out its desired exploration programs; inability to fund the Company's share of costs incurred under joint venture agreements to which it is a party, and reduction or elimination of its joint venture interest as a result; competition within the minerals industry to acquire properties of merit, and competition from other companies possessing greater technical and financial resources; difficulties in executing exploration programs on the Company's proposed schedules and within its cost estimates, whether due to weather conditions in the areas where it operates, increasingly stringent environmental regulations and other permitting restrictions, or other factors related to exploring in the north, such as the availability of essential supplies and services; factors beyond the capacity of the Company to anticipate and control, such as the marketability of minerals, government regulations relating to health, safety and the environment, the scale and scope of royalties and taxes on production; unusually mild winter conditions affecting or delaying the opening of the winter roads and resulting difficulties in transporting materials needed to support various exploration projects and resulting increased costs of transport by air; the availability of experienced contractors and professional staff to perform work in a competitive environment and the resulting adverse impact on costs and performance and other risks and uncertainties, including those described in each management discussion and analysis. In addition, forward-looking information is based on various assumptions including, without limitation, assumptions associated with exploration results and costs and the availability of materials and skilled labour. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements. Accordingly, readers are advised not to place undue reliance on forward-looking information. Except as required under applicable securities legislation, the Company undertakes no obligation to publicly update or revise forward-looking information, whether as a result of new information, future events or otherwise.

Cautionary Note to United States Investors:

We advise United States investors that this presentation contains terms which are not recognized by the United States Securities and Exchange Commission ("SEC"), including "mineral resources", "indicated resources" and "inferred resources". "Inferred Mineral Resources" have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. United States investors are cautioned not to assume that all or any part of Indicated Mineral Resources will ever be converted into Mineral Reserves. United States investors are also cautioned not to assume that all or any part of a Mineral Resource is economically or legally mineable. Except as required by law, Independence Gold does not intend, and undertakes no obligation to continually update forward-looking statements and information as conditions change. Investors are referred to the full discussion of the Company's business contained in the Company's reports filed with the securities regulatory authorities in Canada. All forward-looking statements and information contained in this presentation are qualified by this cautionary statement.

This presentation does not constitute investment advice, or an inducement or recommendation to acquire or dispose of any securities in Independence Gold, in any jurisdiction (including the USA). This presentation is for information purposes only, is in a summary form, and does not purport to be complete. No investment decision should be made in reliance on this presentation. Independent financial and taxation advice should be sought before making any investment decision.

MOOSEHORN GOLD ANOMALY

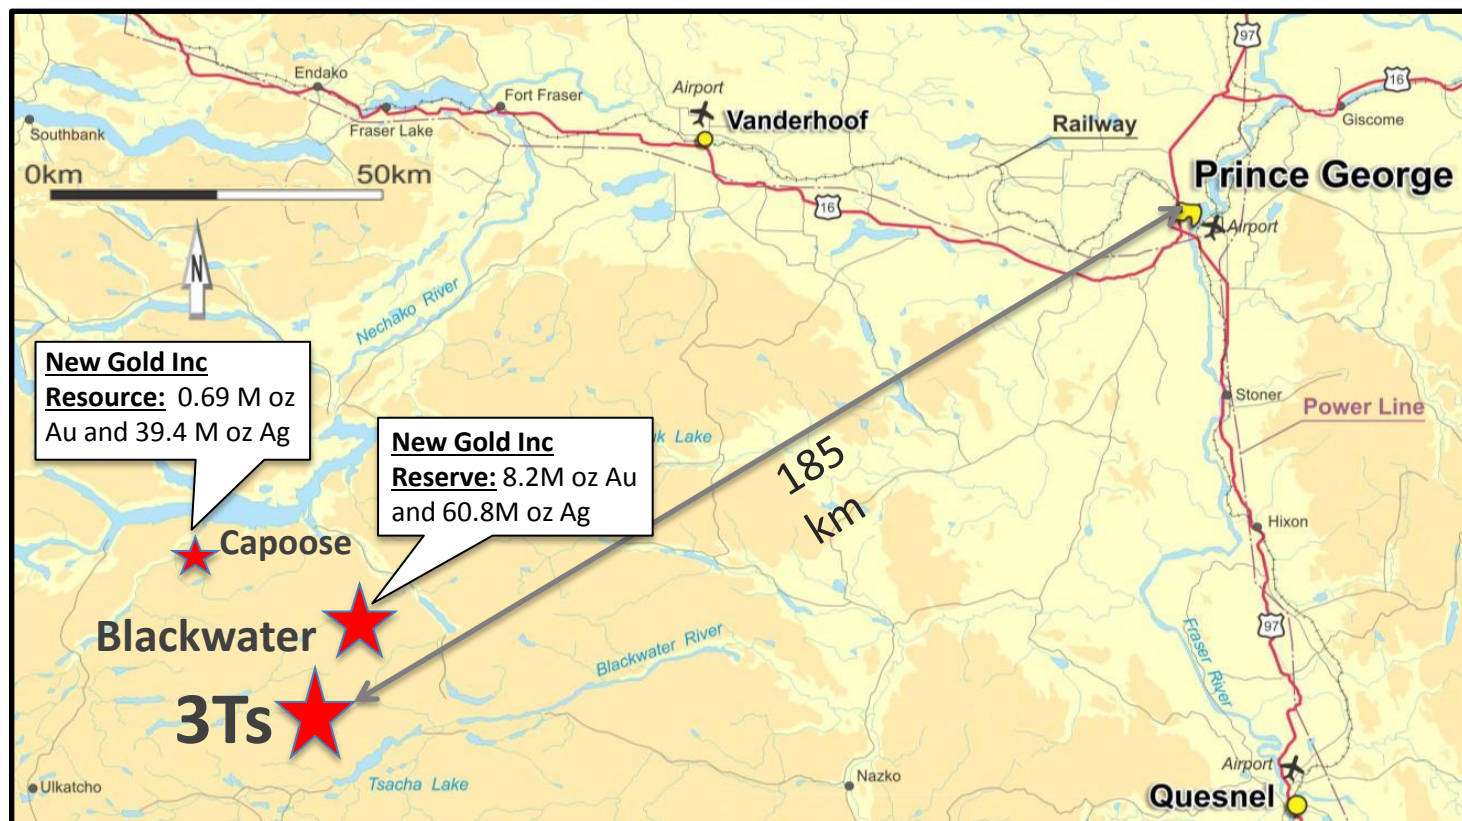

ROSEBUTE - HUDBAY

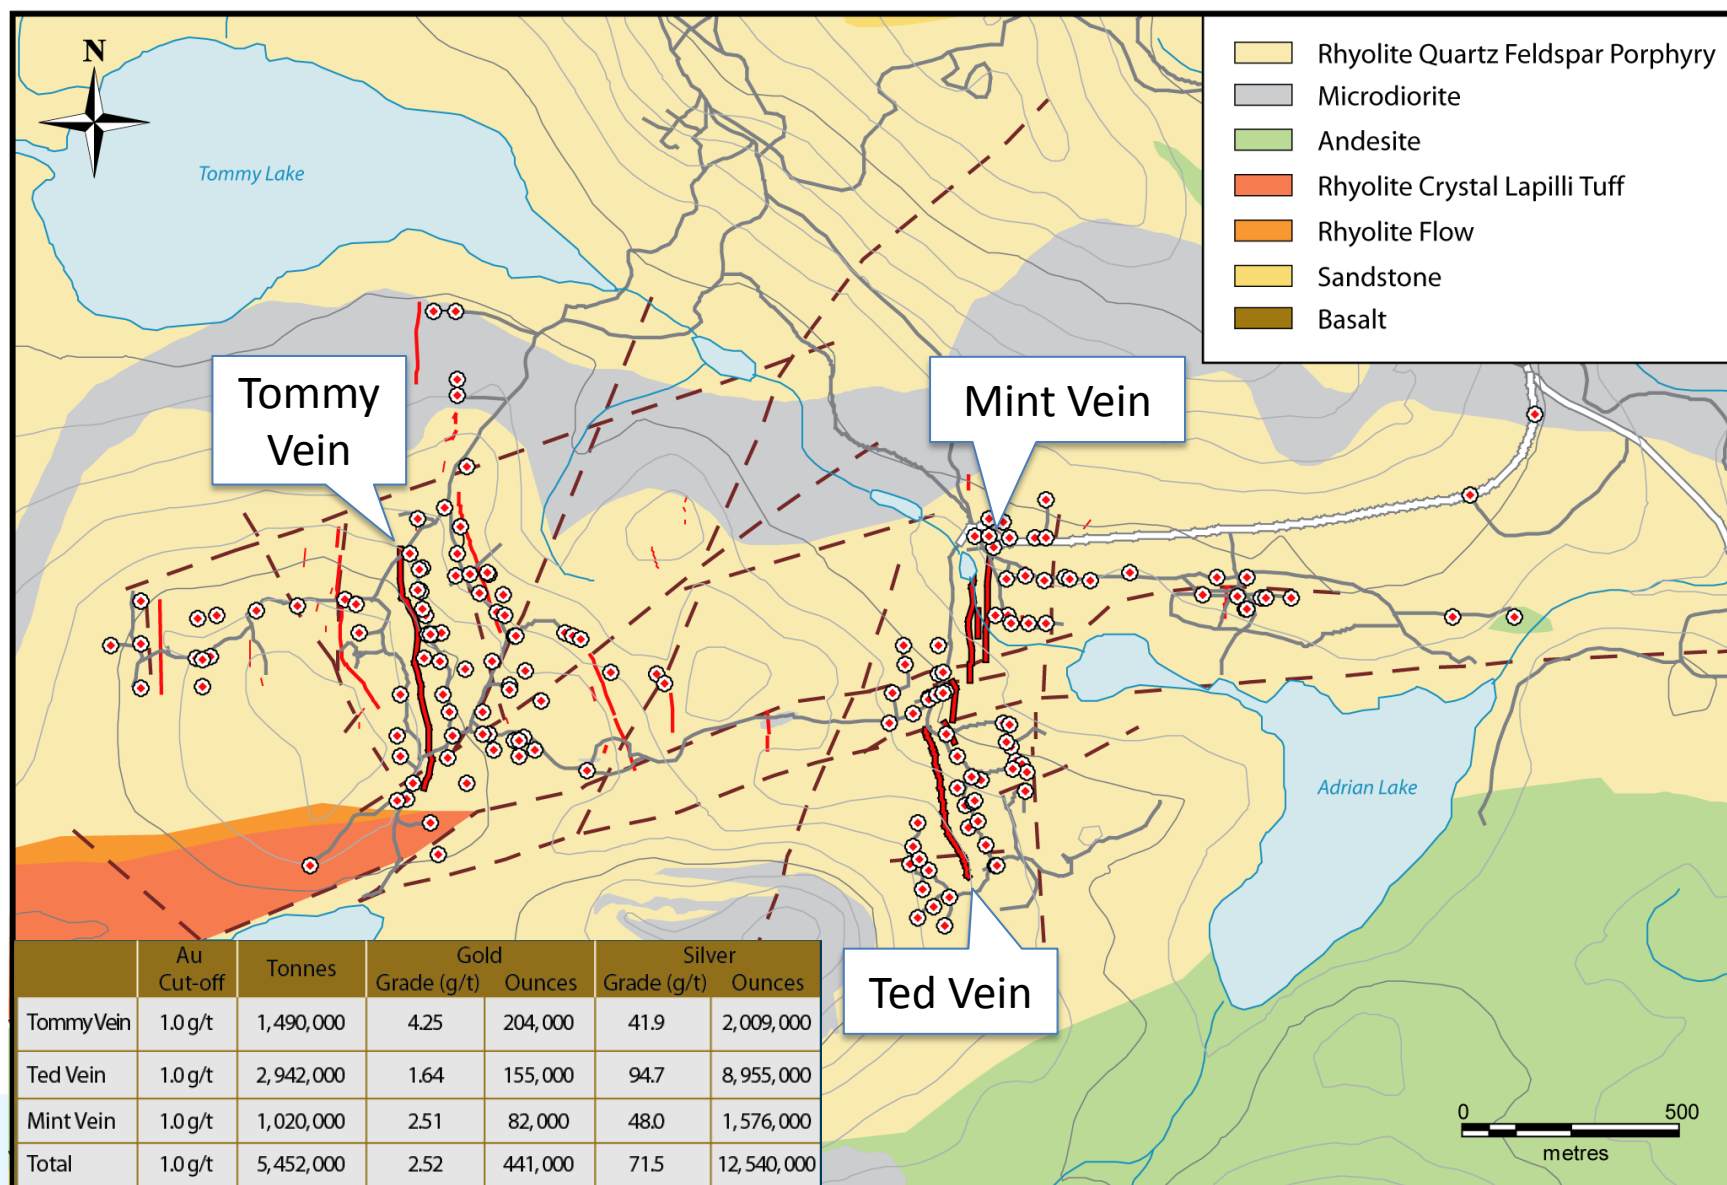

- 14,000 ha property with extensive soil coverage and trenching
- Drill-ready target, 29 km north of Golden Saddle
- Three soil anomalies ranging from 0.6 – 1.7 km all open along trend
- HudBay Zone: Trenching returned 1.5 g/t Au over 20 m, 6.2 g/t Au over 5 m and 0.32 g/t over 65 m
- Norwest Zone: Drilling intersected 1.0 g/t Au over 22.6 m within orthogneiss, 1.7 km northwest of Hudbay Zone

3Ts Location

- 14 claims covering ~4,900 ha in the Nechako Plateau Region, Central BC
- 12 parallel mineralized quartz-carbonate epithermal veins

3Ts GEOLOGY

3Ts TOMMY EAST VEIN

- Multiple episodes of vein formation
- Within interval grading: 12.6 g/t Au and 66.8 g/t Ag across 3.9 m (true thickness; TS05-108)

DIRECTORS AND MANAGEMENT

Randy Turner, BSc, PGeo – President, CEO and Director

Mr. Turner is a Professional Geologist with over 40 years of experience in Canadian and international exploration, business and financing. Notable achievements include guiding Winspear Diamonds Inc. from the discovery of the Snap Lake diamond deposit through to its sale to De Beers Mining for C\$305 million and the sale of Silver Quest Resources Ltd. to New Gold Inc. for \$180 million.

John McDonald, PhD, PGeo – Director

Dr. McDonald is a Professional Geologist with over 45 years of mineral exploration and research experience, including 20 years providing technical advice to junior companies and 13 years as a professor at the University of Saskatchewan. Dr. McDonald was a Co-founder and Chairman of the Mineral Deposit Research Unit (MDRU) at the University of British Columbia.

Robert McLeod, MSc, PGeo – Director

Mr. McLeod is an exploration geologist with over 20 years experience working for a variety of major and junior exploration and mining companies. Mr. McLeod was part of the Miramar team that discovered the Naartok deposit, and was Vice-President Exploration for Underworld Resources, where his team acquired, discovered and delineated the Golden Saddle and Arc Deposits. Mr. McLeod is currently President and CEO of IDM Mining Ltd. and Copperbank Resource Corp.

Michael McPhie, MSc – Director

Mr. McPhie is a mining executive with over 20 years of international operational, financial and project development experience. He is currently Managing Director of JDS Gold and JDS Copper Ltd. Previously Mr. McPhie was the President & CEO of Curis Resources Ltd., Executive Vice President of Exeter Resource Corporation, President & CEO of MABC and as a senior policy director with Natural Resources Canada. Mr. McPhie is also the past Chair of AME BC and BCIT.

Louis Montpellier, Director

Mr. Montpellier is a lawyer with over 30 years experience in mining, corporate finance and M&A work who currently acts as an independent director and committee member for a number of mineral exploration and development companies.

Susan Neale, CGA – CFO

Ms Neale is a chartered accountant with over 20 years experience in corporate transactions, public markets and in-depth accounting and auditing, working with mineral exploration, development and operating companies in Canada and throughout the world.

The Independence Gold Corp. Board and Management Team has over 200 years of collective industry experience and has been involved in several major discoveries, financings and takeovers worth \$1.5 billion CAD
